SALES PERFORMANCE ANALYSIS

Visualization using Python (Matplotlib) | Global Superstore Dataset

By Dhammdeep Gajbhiye

PROJECT OVERVIEW

Analyze sales performance across regions, categories & time.

Identify key trends and patterns in Global Superstore data.

Visualize insights using Python Matplotlib dashboards
Business Problem: Understand sales patterns for strategic decisions.

Dataset: Global Superstore | Tools: Python, Pandas, Matplotlib

DASHBOARD OVERVIEW

Key Metrics at a Glance:

Total Sales: **\$12.6M**

Total Profit: **\$1.47M**

Orders: **51,290**

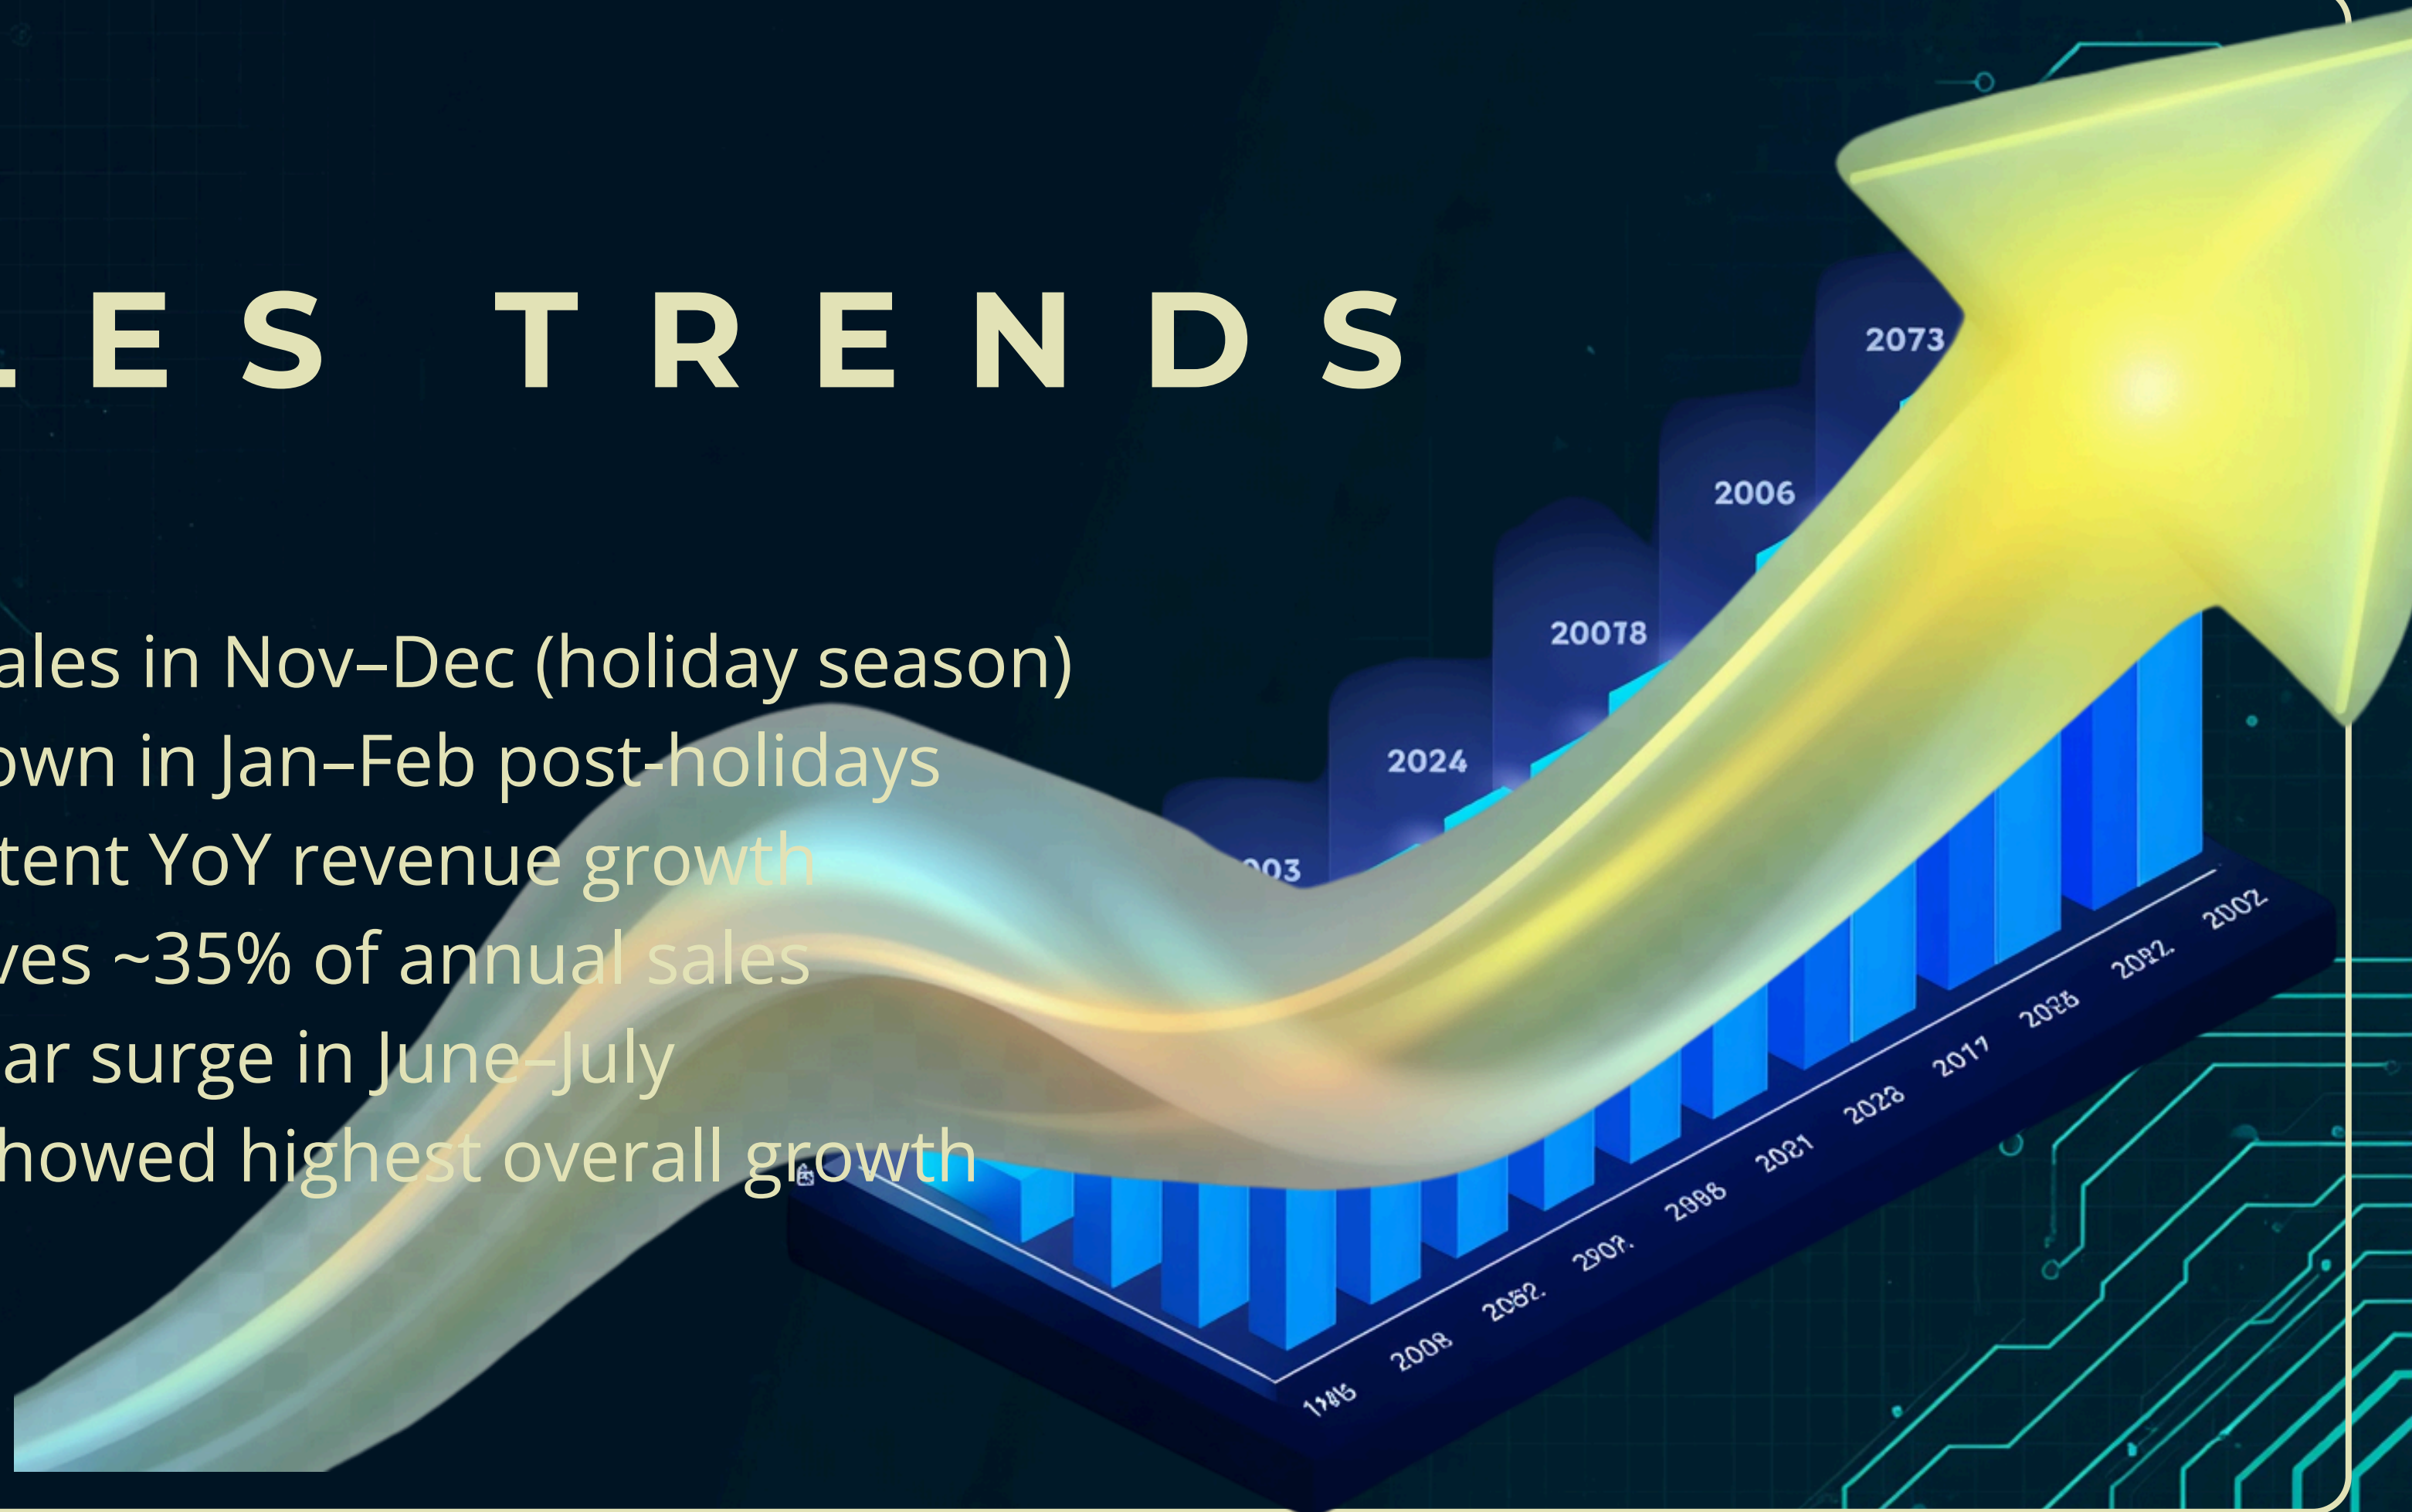

Regions: **4** | Markets: **7**

The interactive dashboard integrates sales, profit, regional performance, and category breakdowns — built with Python (Matplotlib & Pandas) on the Global Superstore dataset for end-to-end business intelligence.

SALES TRENDS

-  Peak sales in Nov–Dec (holiday season)
-  Slowdown in Jan–Feb post-holidays
-  Consistent YoY revenue growth
-  Q4 drives ~35% of annual sales
-  Mid-year surge in June–July
-  2017 showed highest overall growth

REGIONAL PERFORMANCE

East Region
Highest revenue
contributor

West Region
Strong growth trend

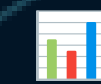

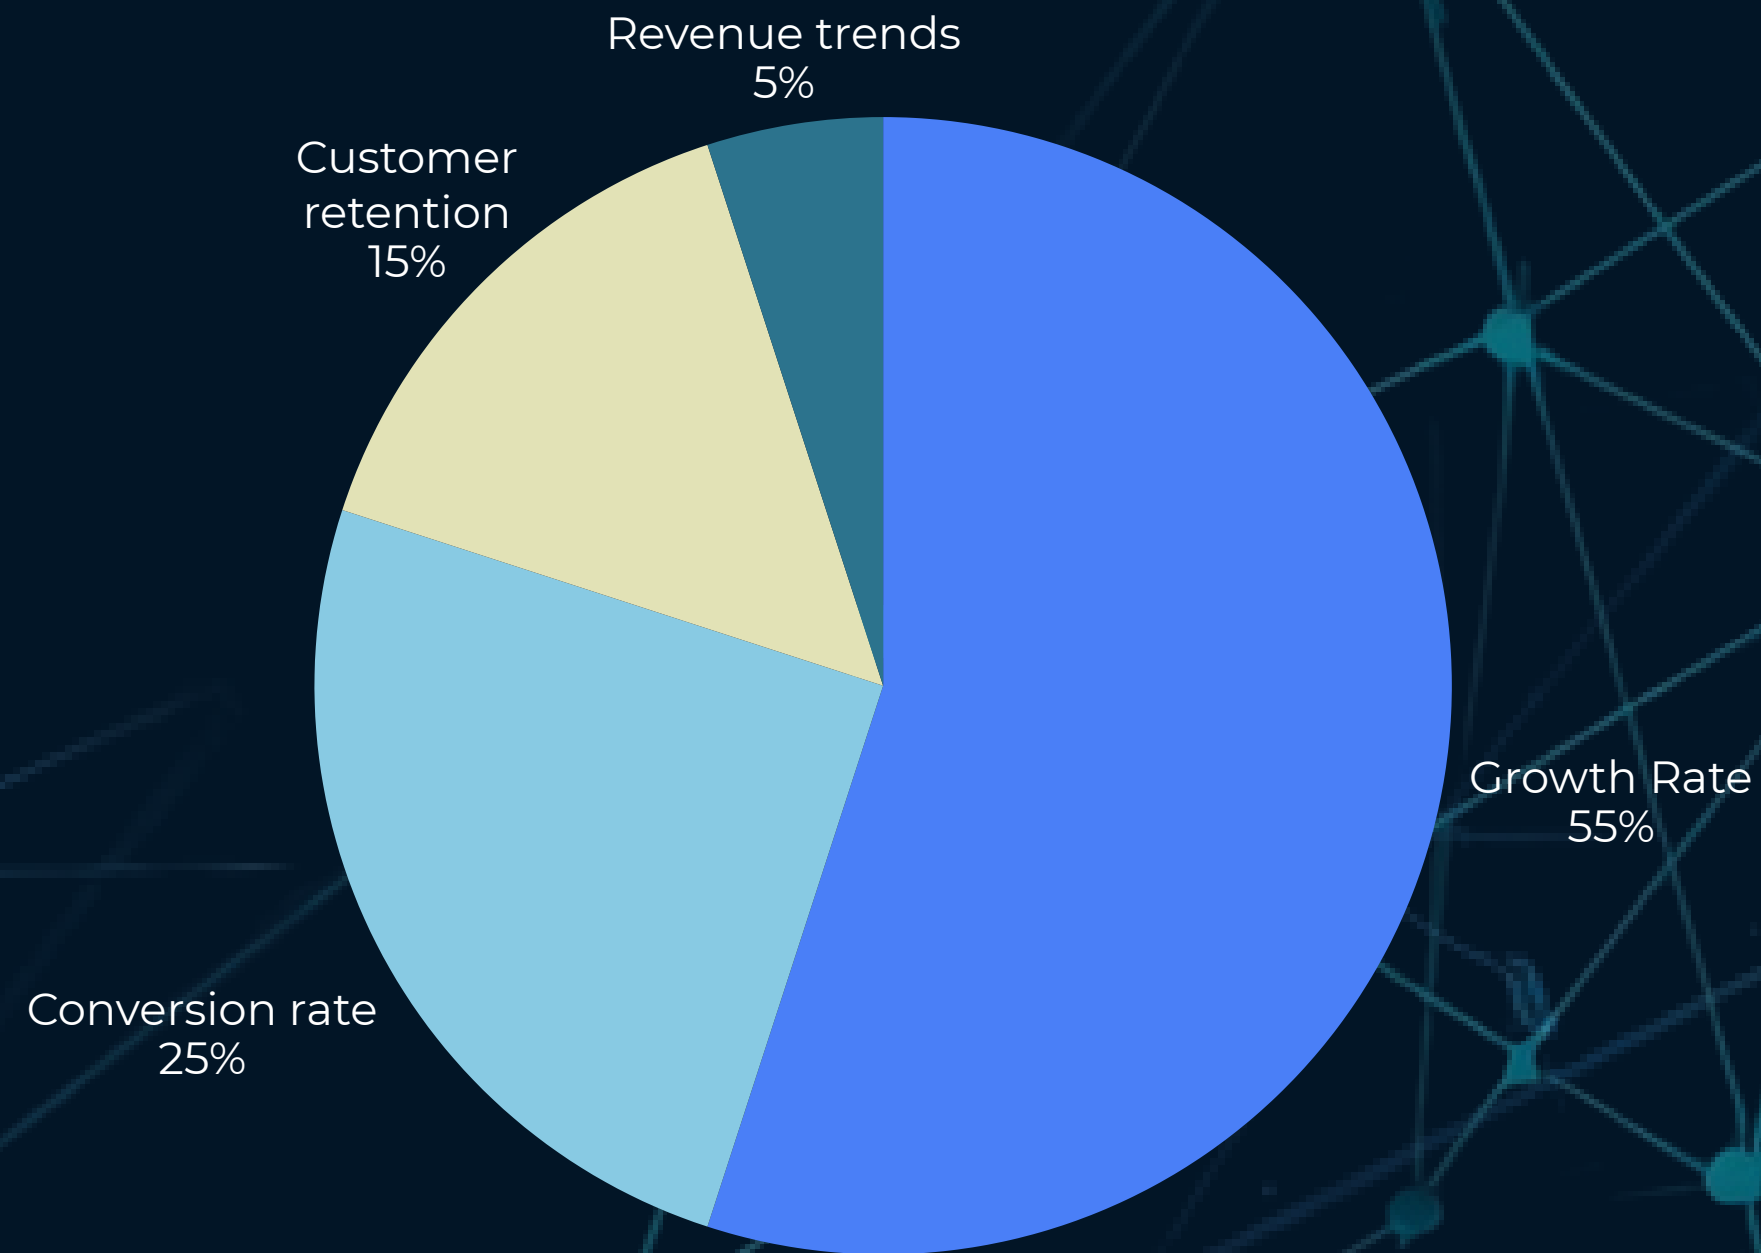

Central Region
Steady performance

South Region
Emerging market

PROFITABILITY ANALYSIS

Category-Wise Profit Distribution:

- Technology: Highest profit margin (~45%)
- Office Supplies: Moderate contribution (~35%)
- Furniture: Lowest margin, often near break-even (~20%)

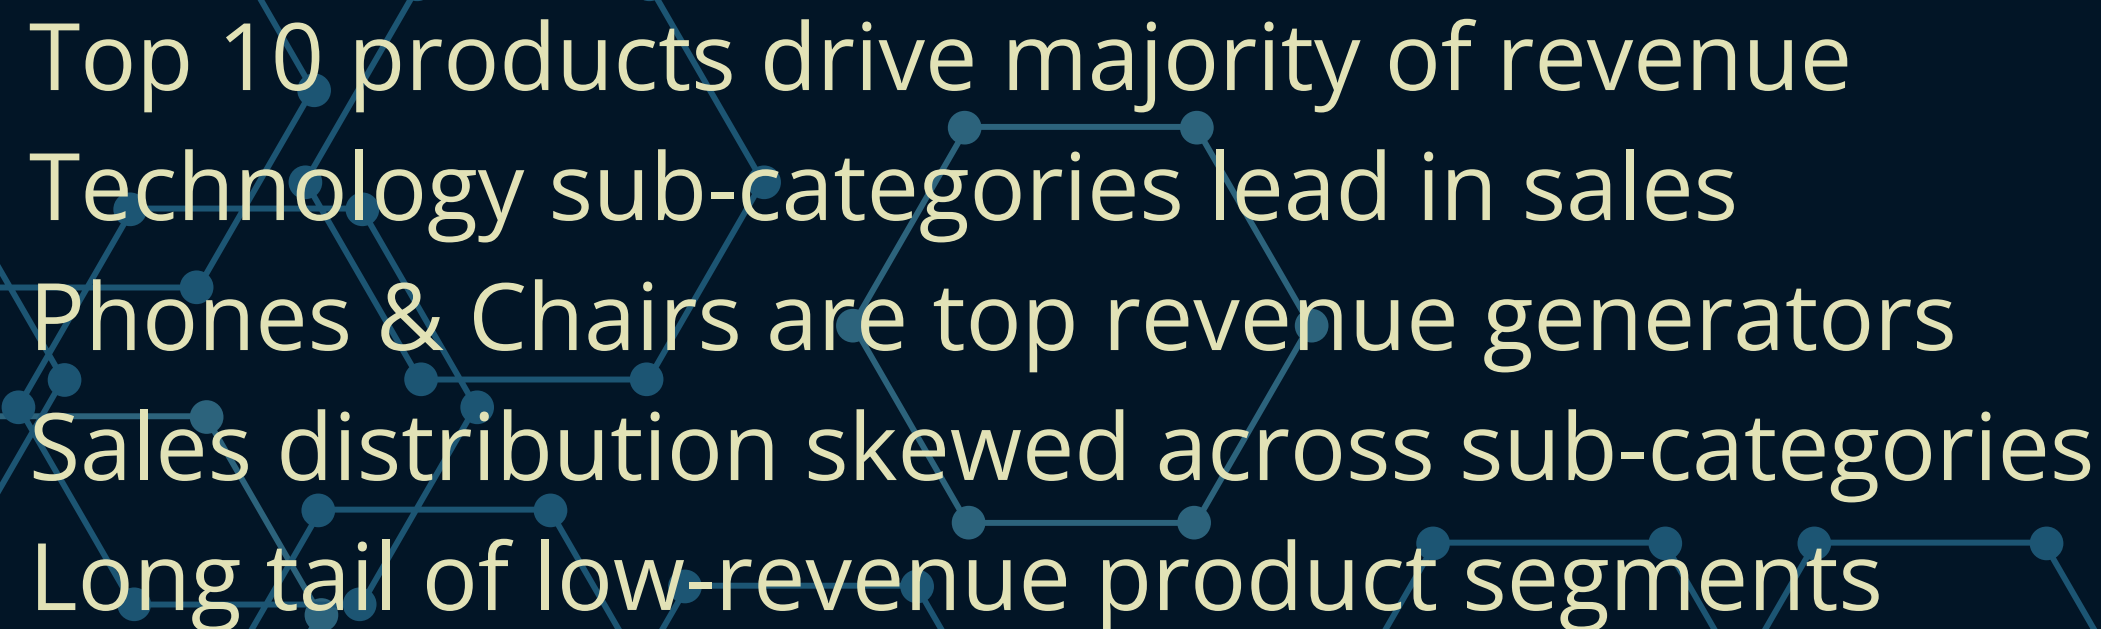

Sales vs Profit Insights:

- High sales $\neq$ High profit (Furniture paradox)
- Technology drives the best ROI per unit sold
- Discounts heavily erode profit in Furniture
- Office Supplies show consistent, stable margins

Key Takeaway: Prioritize Technology & optimize Furniture pricing strategy to maximize overall profitability.

PRODUCT
PERFORMANCE

Top 10 products drive majority of revenue
Technology sub-categories lead in sales
Phones & Chairs are top revenue generators
Sales distribution skewed across sub-categories
Long tail of low-revenue product segments

KEY BUSINESS INSIGHTS

-  Seasonal peaks drive ~40% of annual revenue
-  Technology leads in profitability across all regions
-  Significant regional disparities identified in sales performance
-  Growth opportunities exist in underperforming product categories

BUSINESS RECOMMEN DATIONS

Optimize inventory for peak seasons & holidays
Focus on high-margin product categories
Expand operations in high-performing regions
Improve underperforming product lines
Leverage data-driven pricing strategies
